

# International Summer Program in Architecture INDUSTRIAL URBANISM

**June 22 to July 12, 2017** Ho Chi Minh City: June 22 to July 1; Singapore: July 3 to 12

Studio SGN-SIN is a three-week credit-bearing course organized annually by the HKU Department of Architecture since 2010. It is a design and research studio that travels to multiple cities in Asia. This year, the program will travel to Ho Chi Minh City and Singapore. In particular, students would study the effects of industrial production and their adjacency to requisite urban functions such as housing and commerce. These forms of production have new appearances as late-industrial or post-industrial forms because of their strategic importance and complex organization within the highly urbanized contexts. Taught by a diverse group of faculty members from HKU and speakers from internationally renowned universities and independent research groups, the course offers participants an unrivaled learning experience within Asia's most dynamic contexts.

Students will have the benefit of visiting unique areas of the city under-going massive change, exploring and discussing broad-ranging issues through historical and theoretical concepts in identity, post-colonialism, nationalism and globalisation. The learning process is positioned on the multiple fronts of society, industry, culture and the city. Learning activities include lectures, seminars, studio crits, field work, visits to experimental practices and sites, and forums for active discussions.

#### Eligibility

The program welcomes all undergraduate & graduate students, and recent graduates in the disciplines of architecture, landscape, urban design, urban planning and policy, urban studies, and all allied design and engineering fields. This program is not limited to professional degree students, hence liberal arts students with a relevant major or minor are also eligible. Applicants should have completed at least one year of study at their home institution. Participants must be proficient in English, and some knowledge of visual analysis software is preferred.

#### Deadline & Fee

Deadline : June 2, 2017  
Full Program (credit-bearing) : HKD 16,270 (USD 2,100)  
Single-City Program (not-for-credit) : HKD 9,760 (USD 1,260)

Fees to be paid in HKD. Accommodations & airfare not included.
