Issue 7, October 2020

Recruitment

88 participants recruited...72 to go!

We would appreciate any extra support with PantoCIN participant recruitment as we try to catch up after the effects of the COVID-19 pandemic.

160 target

Our second shipment of drug is expected for the remaining sites this month.

Well done to our top recruiting site:
Palmerston North Hospital
who were the first site to recruit 20 participants!

At the halfway mark... Data Monitoring Committee (DMC) are set to meet

Data cut off is 12 October 2020—ensure all data updated to this date

What is a DMC... an semi-independent group of experts who monitor **patient safety** and **treatment efficacy data**, while a clinical trial is ongoing.

What do we prepare for a DMC... complete data for the trial up to the data cut off. The data cut off for PantoCIN is 12 October 2020.

PantoCIN Site steps for the DMC

- Check your participant ALEA records and enter data for all forms including AEs
- Resolve any queries on data—check the queries tab regularly and click the form link to view the query
- Enter paper questionnaire data on the ePRO module online

Over the coming weeks, we ask that you more regularly check in on ALEA for any new queries as we check and clean the data in line with the protocol. We will also provide reports/summaries of data for participants and help with resolving any queries you may have by email/phone. Please do not hesitate to contact us with any questions.

Patient reported outcomes

Ensuring PRO data is collected for each participant

Participant primary endpoint data for PantoCIN is vital data that patients submit using questionnaires. If there is any problem with completing questionnaires, then the participant may complete them on the telephone with a member of the site delivery team. If the participant is not able to attend hospital, then please consider providing a stamped addressed envelope, (in your site file) with your address.

**For your ongoing support
of the PantoCIN study**
