

Paper Number	Paper Title	First Name	Last Name
418	Automated anomaly detection in fisheries from Electronic Monitoring: Modelling human activities using Artificial Intelligence	Debaditya	Acharya
101	Important Shark and Ray Areas: A process for delineating critical habitats for sharks, rays, and chimaeras around the globe	Asia	Armstrong
238	The UBC Fish Collection under the Beaty Biodiversity Museum: Status, challenges, and perspectives	Nicolas	Bailly
264	Fish global information infrastructure: Linking existing fish biodiversity information systems	Nicolas	Bailly
34	The basal Eocene (ca. 55.5 Ma) Tethian marine fish fauna from southwestern Russia	Alexander	Bannikov
589	Updating FishNet2 to serve the needs of the ichthyological research community	Henry	Bart
591	"Ghosts in the machine" of diversification analysis	Jacob	Berv
586	Genomic signatures associated with ecological transitions in freshwater catfish clades of marine origin, with emphasis on an adaptive radiation	Ricardo	Betancur-R.
510	The mechanisms of habitat change in the cavefish <i>Astyanax mexicanus</i>	Helena	Bilandzija
461	Can small habitat enhancements benefit fish assemblages adjacent to the Sydney Opera House?	David	Booth
388	Ngā Ika e Heke- The Department of Conservation's freshwater migratory species programme	Jane	Bowen
439	The role of fish in coral recruitment on complex artificial reef structures	Marion	Chapeau
527	Fish passage in the Australian tropics – lessons from four seasons of fishway monitoring	Geoff	Collins
564	The golden opportunity – biomonitoring sandy beach marine fishes using environmental DNA.	Heath	Cook
126	OceanOmics: Bolstering marine research and conservation with genomic technologies	Shannon	Corrigan
252	Dermal armour of Syngnathidae: encasing a diversity of forms	Caio	Dallevo-Gomes
578	Newly discovered populations of Clutha flathead galaxiid (<i>Galaxias</i> 'species D') in the Cardrona Valley likely facilitate downstream dispersal of individuals	Isaac	Davies
164	Taxonomic review of the triplefin genus <i>Enneapterygius</i> (Tripterygiidae) in Japanese waters	Yuna	Dewa
121	Reconstructing Ancestral Reproductive Modes In Sharks: How Difficult Is It to Evolve (and Re-evolve) Viviparity?	Diala Joy	Edde
566	Spatio-temporal variability of life-history traits of two species of amphidromous gobies: <i>Sicyopterus lagocephalus</i> and <i>Sicyopterus pugnans</i> , recruiting in Tahiti Island	Celine	Ellien
237	Exploring the relationship between egg deposition in <i>Schroederichthys chilensis</i> and kelp morphological attributes in nesting sites in Chile	Italo	Fernández-Cisternas
221	Reappraisal of Indo-Pacific holdings of the Scripps Institution of Oceanography Marine Vertebrate Collection	Ben	Frale
93	"Coastal Fishes of New Zealand" – the 5th edition	Malcolm	Francis
585	Understanding the drivers of Grey Nurse Shark movement and capture in fisheries gear along the east coast of Australia	Pablo	Fuenzalida
88	A preliminary revision of the clingfish subfamily <i>Diademichthyinae</i> (Gobiesocidae)	Kyoji	Fujiwara
167	Species diversity of the synodontid genus <i>Synodus Scopoli, 1777</i> in the Indo-Pacific Ocean	Ryusei	Furuhashi
360	Exploring the genetic structure and evolutionary history of marine fish populations in Micronesia	Michelle	Gaither
379	Translocation of native freshwater species: balancing good intentions with science and pragmatism	Jane	Goodman
219	Spatial distribution of an anemonefish population: effects on recruitment, survivorship, and the ramifications of a reduction in sea anemone habitat	Denis	Goulet
218	Clownfishes' obligatory mutualism may lead to their demise	Tamar	Goulet
354	Assessing the global extent of climate risk for genetically informed populations of Yellowtail Kingfish, <i>Seriola lalandi</i> .	Ben	Grier
315	"Project Kingfish": a collaboration with recreational anglers to research and inform the management of yellowtail kingfish off eastern Australia	Tristan	Guillemin
450	Morphometric study of widely distributed species of <i>Bregmaceros</i> (Bregmacerotidae: Teleostei), with a focus on Indian Ocean forms	Antony	Harold
23	Poor labelling of shark products in Australia's fish and chip shops	Md Robiul	Hasan
230	Three distinct species included in specimens identified as <i>Priacanthus tayenus</i> (Priacanthidae) based on morphological and molecular analyses	Shintaro	Hashimoto
28	Unmasking pipefish otoliths using synchrotron-based scanning X-ray fluorescence	Vincent	HAÿ
520	Territoriality and dear enemy relationships in ayu <i>Plecoglossus altivelis</i>	Kota	Hayashi
588	Preliminary results on the gut plasticity of reef fishes across different feeding strategies in the Tropical Eastern Pacific	Natasha	Hinojosa
133	The usefulness of eDNA metabarcoding for monitoring fish fauna in a large lake: the South Basin of Lake Biwa, Japan	Gen	Ito
433	Large-scale larval study reveals fine morphological differences: the case of Sciaenidae	Si-Yeong	Jeong
152	Can acoustic telemetry be used inside mangrove habitats?	Shiori	Kanno
179	Ancient DNA techniques applied to formalin-fixed ethanol preserved fish specimens to help answer previously intractable biological questions	Adam	Kitchen
532	Cavefishes across the ocean: evidence for amphidromy in a cavernicolous goby on tropical islands	Hirozumi	Kobayashi
312	Food provisioning of anemonefish to host sea anemones: what they provide and their effects on the host	Yuya	Kobayashi
228	Male medakas mate with females despite sperm depletion	Yuki	Kondo
95	Males of nest-spawn fish lure females using attractants produced by their kidney.	Yasunori	Koya
98	Environmental DNA metabarcoding reveals the impact of riverine slope on ichthyofauna in the rivers of subtropical Yakushima Island, Japan	Yusuke	Kumai
317	A critically endangered Ryukyu-ayu <i>Plecoglossus altivelis ryukyuensis</i> in Japan's latest world natural heritage site "Amami-Oshima Island", southern Japan	Gen	Kume
13	Application of environmental DNA metabarcoding for detection of non-native fish species in an urban river in Tokyo, Japan	Mari	Kuroki
332	Relative growth of southern bluefin tuna (<i>Thunnus maccoyii</i>) larvae in the eastern Indian Ocean	Raúl	Laiz-Carrión
534	Distribution and habitat characteristics of the juvenile mudskipper, <i>Periophthalmus modestus</i> on the Edogawa flood channel	Yijin	Lee

18	Genetic Barcoding and Population Biology of all Diadromous Fish, Shrimp and Snails Native to Guam.	Daniel	Lindstrom
10	The role of colour patterns in anemonefish species recognition	Noah	Locke
216	Discovery of parasites of tropical island freshwater fish: a new angle to study migrations of diadromous species.	Clara	Lord
438	Phylogenetic patterns and diversification rates of scalpel morphology and the novel venom delivery system of surgeonfishes (Acanthuridae)	Linnea	Lungstrom
590	Post-release mortality of line-caught snapper (<i>Chrysophrys auratus</i> : Sparidae) depends on hook site and capture depth: results from a controlled field experiment	Jade	Maggs
316	Engineering <i>Drosophila melanogaster</i> to produce carbohydrase enzymes for aquaculture.	Justin	McNab
440	That's a lot of fish! Daily fish movement revealed using an imaging sonar, in an Australian estuary.	Kristen	McSpadden
351	Population Genetics of the Catadromous Eel, <i>Anguilla marmorata</i> , in the Indo-Pacific	Karina	Mejia
592	Spatio-temporal variability in occurrences of tropical, subtropical and rare marine fishes in Aotearoa New Zealand	Irene	Middleton
593	Formalin-fixed paraffin-embedded (FFPE) samples help to investigate potential lamprey disease	Allison	Miller
47	Comparison of juvenile morphology and assessment of ontogenetic morphological changes in three species of seahorses <i>Hippocampus</i> spp. from south-eastern Australia	Tony	Miskiewicz
432	Seeing stripes: using the optomotor response to investigate differences of visual acuity between coral reef fishes	Claire	Moad
530	Sustained productivity and the persistence of coral reef fisheries	Renato	Morais
331	Early gonadal development, maturation and sex change in diandric protogynous red-belted anthias, <i>Pseudanthias rubrizonatus</i>	Emma	Moritoshi
162	Preliminary review of the interstitial gobiid genus <i>Luciogobius</i> Gill, 1859 in the Ryukyu Archipelago, Japan	Hiroyuki	Motomura
213	Homoploid hybrid speciation in <i>Torpedo</i> scad <i>Megalaspis cordyla</i> in the western Pacific	Nozomu	Muto
500	Testing a new method for assessing mirror self-recognition in three-spined sticklebacks	Shota	Nakano
441	Examining Biogeographic Variation in a Fish-Bacteria Bioluminescent Symbiosis	Emily	Neff
473	First report of schooling behavior, social structure, and spawning in <i>Canthigaster margaritata</i>	Viktor	Nunes Peinemann
91	Re-evaluation of the generic diagnoses of the family Samaridae (Pleuronectiformes) with comments on the phylogeny of the family	Kota	Obata
82	Environmental DNA (eDNA) based biomonitoring of fish and coral assemblages in changing environments under coastal development	Ayşe Haruka	Oshima Açıkbaş
241	Spatial distribution and habitat use of Dottybacks (Pseudochromidae) and color morph plasticity in <i>Pseudochromis flavivertex</i> .	Stephanie	Palacios Narvaez
434	Comparison of juvenile morphology and assessment of ontogenetic morphological changes in three species of seahorses <i>Hippocampus</i> spp. from south-eastern Australia	Kerryn	Parkinson
187	Neurogenomic patterns social and asocial learning of cooperative rules in cleaner fish	Jose Ricardo	Paula
38	IBRtools: an R package that integrates biomarker-based assessments and radar chart creation	Anna	Resende
444	A catalog of Indo-Pacific fish eggs from US public aquaria	Claudia	Rocha
533	Baiting and citizen science: a comparative study of BRUVs and eDNA surveys throughout estuaries in New South Wales.	Sebastian	Roe
447	Newborn and juvenile reef sharks in a changing world	Jodie	Rummer
277	Unexpected increase in recreational fishing catches during the Covid-19 pandemic	Muhammad Faiq	Saleh
89	Why and how the small males occur in the polygamous mating groups of the protogynous goby <i>Fusigobius neophytus</i> (Gobiidae)	Ryoga	Seiwa
494	Larval freshwater fish and parasites in Australia – an update	Shokoofeh	Shamsi
220	Larval fish assemblage from the French EEZ in the southwestern Indian Ocean	Akihiro	Shiroza
478	When and where: How seascape context and site maturity influences fauna in restored seagrass	Michael	Sievers
301	Assessing the Impact of Introduced Perch through non-lethal Sampling Methods of Native Threatened Eels	Nathan	Silcock
547	Utilization of non-invasive environmental DNA (eDNA) sample collection for shark species identification and mitochondrial haplotyping in Hawai'i.	Brad	Smith
243	Genomic and epigenomic signatures of thermal adaptation in fish	Dragan	Stajic
149	Clubbing stomatopods dominate cryptobenthic fish predation in coral-depauperate habitats	Sam	Swan
536	Assessing a novel ingredient as part of a sustainable diet to support growth in captive Yellowbelly flounder	Caitlin	Thomson
546	Using eDNA to assess how estuarine fish communities respond to consecutive extreme events of drought, bushfire, and flood.	Jessica	Tout-Lyon
205	Insight into the diet of early stages of mesopelagic fishes in the Indian Ocean using DNA metabarcoding	Aimee	van der Reis
156	Blue Belt Programme – Preliminary results on age-based life-history traits of three targeted species from the Pitcairn Islands.	Valerio	Visconti
474	Current status of the type specimens of extant fishes registered in The University Museum, The University of Tokyo	Hidetoshi	Wada
80	Facing invasion, how to save the marine fisheries ecosystem from a persistently escaping alien competitor <i>Sciaenops ocellatus</i> ?	Jiehong	Wei
232	Spatial ecology of silky sharks at a provisioning site in the Red Sea	Collin	Williams
120	Fisheries ecology of rock flathead (<i>Platycephalus laevigatus</i>) in south-eastern Australia	Darren	Wong
594	Optimal recommendations for field and laboratory protocols of eDNA and applications in fish diversity in lake ecosystem of China	Yingchun	Xing
155	Long-term changes in the growth of the Japanese rockfish <i>Sebastes cheni</i> in a macroalgal bed in relation to seaweed abundances	Keito	Yamamoto
207	A chromosome-level genome assembly of the Antarctic lanternfish <i>Electrona antarctica</i> : a resource for adaptation and conservation studies on polar fish	JIE	ZHANG
