

5 CHARACTERISTICS

- 1. Non-Representational Art: hard to define the photographer's message in her photos.**
- 2. The photos are created using photography equipment that has yet to have an immediate association with the physical world.**
- 3. Unrecognizable image: Uses perspective, movement, and light to transform the world we see into an unexpected.**
- 4. Photos change how we view the world by playing with perspectives, such as taking pictures from below, above, or close-up.**
- 5. Using patterns and color helps explore the light and texture of the photos. Textures, especially, evoke different atmospheres and feelings in the viewers.**
