

How to make a **Zine!**

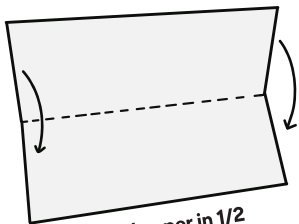

**you will need...*

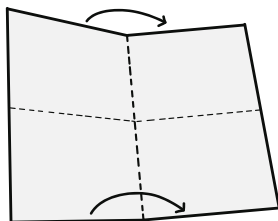

...a sheet of paper

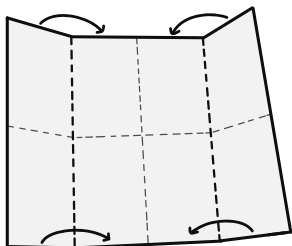

...scissors

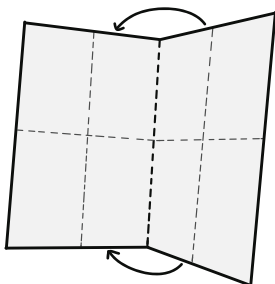

① fold paper in 1/2 (horizontally)

② fold paper in 1/2 again the other way (vertically)

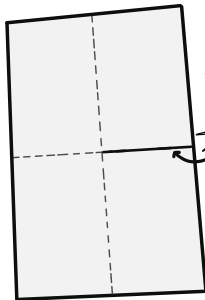

③ next 1/4 fold each side of the paper into the middle

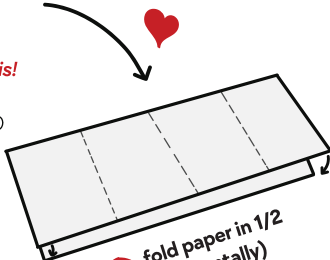

④ now fold your paper back in half ready to cut...

**you should now have x8 folded panels*

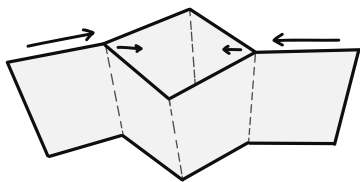

**like this!*

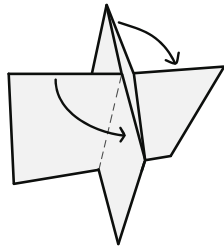

⑤ cut along this center line until you meet the next fold (center of the paper)

⑥ fold paper in 1/2 (horizontally)

⑦ notice your cut at the top, push the ends together so that the middle of your zine opens out

⑧ fold the two ends of the zine that you're holding together, this will form the front and inside of the zine

⑨ then fold the back cover into place!

**sometimes it takes practice to get the zine pages lining up, but what makes a zine is their imperfections!*
