

**Lab Week 2: Sudoku Activity**

---

In this lab session you will undertake a study to investigate how long it takes to complete a Sudoku puzzle. You will be provided with detailed instructions at the start of the lab.

Space is provided below for you to record relevant information about this study. There is a strong possibility that you will need to refer to these notes in future assessment tasks.

---

**1. Research question/s considered**

- **Primary research question**
- **Other research question 1**
- **Other research question 2**

**2. Variables measured**

Response variable (and type)

Explanatory variables (and type)

- Explanatory variable 1
- Explanatory variable 2
- Explanatory variable 3

**3. Variables not measured** (that may have impacted on the time to complete the puzzle)

#### **4. Preliminary Analysis – for primary research question (at least)**

**Summary stats**

**Graphical Display (rough sketch is sufficient)**

#### **5. Conclusions**
