Recruitment Team
Main Roads Western Australia
Perth, WA

Dear Hiring Manager,

I am excited to apply for the Technical Trainee – Engineering position with Main Roads Western Australia, commencing in January 2026. With a strong interest in civil and structural engineering, a commitment to learning, and a genuine desire to contribute to projects that connect communities across Western Australia, I am eager to begin my engineering journey through your two-year traineeship program. Having recently completed [Year 12 / Certificate — ii, iii, iv in Business, I have built a solid foundation in mathematics, problem-solving, and design principles. I have also developed strong computer skills and a keen interest in Computer Aided Design (CAD), which I am enthusiastic about expanding through hands-on training and mentorship at Main Roads.

I am particularly drawn to this traineeship because of the unique opportunity to rotate through diverse engineering areas such as road design, traffic engineering, and project development. The balance of site-based experience, technical drafting, and formal study towards a Diploma of Civil and Structural Engineering strongly aligns with my goal of building a career in civil infrastructure while contributing to projects that improve the lives of Western Australians.

In addition to my technical foundation, I bring enthusiasm, a willingness to learn, and a strong team-oriented mindset. My previous work and study experiences have strengthened my communication skills, reliability, and ability to adapt quickly to new challenges—qualities I believe will allow me to thrive as part of the Main Roads trainee cohort.

I would like to discuss further how my background, motivation, and career aspirations align with this traineeship. Thank you for considering my application, and I look forward to the possibility of contributing to Main Roads' important work of connecting people and places.

Yours sincerely,
Alek Stefanovich
