**“TEACHERS AND STUDENTS NEED TO ACTIVELY LOOK FOR EXPERTISE AND PEOPLE OF INTEREST IN THEIR ORBITS OF ABILITY...”**

“An orbit of ability is a given person’s knowledge and talent or expertise. When one person moves into another person’s orbit of ability, his or her ability, his or her knowledge and capabilities grow. Every teacher has his or her own orbit or orbits of ability that others can learn from. Accessing orbits of ability can take place during any interaction with colleague, friends, family members, or even a new acquaintance.” Hale and Fisher (2013)
