

PASSION PROJECT

Your task:

To complete a project on something you are passionate about.

Anything you want!

Passion projects are extended projects that you work on over a few weeks.

To start with, think about your passions. What are you interested in? What makes you feel excited? Choose one of your passions to complete your project on. Once you have decided on your topic it's time to plan. Write down some questions you might like to find the answer for. You can use the planning sheet on the next page to help you.

Project Framework

Here are some steps you might like to follow when completing your passion project.

1. **Planning** – complete your planning proposal. Share this with your teacher.
2. **Research** – using your questions that you identified collect and find out the information you need. This might include looking up websites, reading books, talking to people, emailing experts.
3. **Putting it together** – depending on the type of project and how you are planning to present it... create a draft.
 - If you are doing a poster you might write up all the information you want to include and create a plan for what your poster will look like
 - If you are using a PowerPoint – create a rough outline and begin including all your information on your slides
 - If you are creating a movie – create an outline of the scenes and begin writing your script

If you need more ideas, check in with your teacher... they can help you shape what you are doing. Remember, their WebEx room is open for students every day if you want to touch base with them.

4. **Finishing touches** – finish your draft and create your final presentation.
5. **Presenting** – when you have finished, share this with your family and with your teacher. Your teacher will talk with you about how you might share this with your classmates – whether it is as part of WebEx meetings, shared through the class blog or presented when we are back onsite at school.

I can't wait to see what you come up with
GOOD LUCK!

3/4 PASSION PROJECT - Proposal

What are my passions?

-
-
-
-
-
-
-

Planning my project!

The passion I am going to present this project on is:

What questions do I want to find the answer to?

What important things do I need to include in my project?

-
-
-
-
-
-
-

How am I going to present my project?

When your proposal is finished you will need to share this with your teacher to discuss it before completing your project.
