

Digital Descriptors and Your Subject

Developing descriptors for your program/subject:

1. Identify key domains that are relevant to your program/subject in your discipline's work practices that are critical to students' job readiness
2. Check to see if there are existing digital descriptors that fit or could be adapted
3. If there are no existing digital descriptors, then identify the functional, perceptual and adaptive affordances of each domain

Consultation with industry is recommended!

Which digital capabilities are most important in your program/subject?

Identify 1-3 digital capabilities that are important for your program/subject

How do you/can you engage with industry to identify domains, develop and update digital capability descriptors?
